PROFESSIONAL SUMMARY

Accomplished Technical Architect and Senior Full Stack .NET Solution Architect with over 10+ years of enterprise software engineering experience designing, architecting, and deploying scalable, high-performance cloud applications and distributed microservices. Proven domain expertise in C#, .NET 10/9/8, ASP.NET Core, Angular 21, React 19, VueJS, ag-Grid Enterprise, REST APIs, SQL Server, PostgreSQL, and Cosmos DB. Demonstrated leadership in Clean/Onion Architecture, SOLID design patterns, CQRS, Event-Driven Architectures, microservice orchestration, and CI/CD pipelines via Azure DevOps, Docker, and Kubernetes (AKS). Hands-on pioneer in Generative AI, RAG implementations, Vector Search, and AI Agents for high-volume enterprise software systems.

CORE TECHNICAL CAPABILITIES

BACKEND & CLOUD
C#, .NET 10/9, ASP.NET Core, REST APIs, Microservices, Azure Cloud, Azure Functions, Azure Service Bus, Azure APIM, Azure Logic Apps, Key Vault, App Services.

FRONTEND & UI
Angular 21, React 19, VueJS, TypeScript, RxJS, Redux, AGGrid-Enterprise, JavaScript, HTML5/CSS3, Responsive Web Design, SPA Architecture.

DATABASE & PERSISTENCE
SQL Server, PostgreSQL, Azure Cosmos DB, Entity Framework Core, ADO.NET, SQL Indexing, Performance Tuning, ORM, Caching Strategies.

AI & ADVANCED TECH
Generative AI, RAG Systems, Azure OpenAI, AI Search, Vector Embeddings, LangChain, GitHub Copilot, Autonomous AI Agents.

ARCHITECTURE & PATTERNS
Clean Architecture, Onion Architecture, SOLID, Design Patterns, Event-Driven, DDD, CQRS, Circuit Breaker, Dependency Injection.

DEVOPS, SECURITY & TOOLS
Azure DevOps CI/CD, Docker, Kubernetes (AKS), Git, JWT, OAuth2, MSAL, Azure AD, SonarQube, Serilog, App Insights, Unit Testing.

PROFESSIONAL EXPERIENCE

Happiest Minds Technologies — Technical Lead

Aug 2025 – Aug 2026 | Noida, India

Project: SGS Engage (Enterprise Multi-tenant Laboratory Sample Lifecycle & Cross-tab Analytics Platform)

Architected and delivered an enterprise multi-tenant sample management and analytics platform engineered with .NET 10, Microservices architecture, Angular 21, Azure Cloud, and hybrid SQL/NoSQL persistence.

- **Advanced Grid & UI Engineering:** Engineered robust state persistence and custom natural logical sorting algorithms for ag-Grid Enterprise, serializing complex multi-step analytical configurations across session workflows.
- **Containerized Cloud Deployment:** Containerized distributed .NET 10 microservices utilizing Docker and orchestrated multi-environment CI/CD release pipelines to Azure Kubernetes Service (AKS) with dynamic auto-scaling.
- **Hybrid Database Architecture:** Optimized multi-database persistence across SQL Server, PostgreSQL, Azure SQL, and Cosmos DB to effortlessly handle high-frequency transactional payloads and intensive analytical queries.
- **GenAI & RAG Implementation:** Spearheaded end-to-end implementation of an Azure OpenAI RAG search engine leveraging Azure AI Search and Vector Embeddings, enabling sub-second natural-language queries across 1M+ laboratory records.

PROFESSIONAL EXPERIENCE (CONTINUED)

HCLTech — Technical Architect / Associate Manager

Dec 2022 – May 2025 | Noida, India

Project: iReflection (Global Employee Performance Management & Compensation Engine)

Led the technical vision and solution architecture for an enterprise-wide appraisal system evaluating manager ratings and auto-generating compensation letters.

- **Team Leadership & Solution Architecture:** Managed a high-performing 5-member Agile engineering team; owned end-to-end solution design, system architecture, code reviews, technical mentoring, and delivery management.
- **Full Stack Microservices:** Built modular React 18+ frontends connected to .NET 9 Microservices and REST APIs implementing strict Clean Architecture and SOLID principles.
- **CI/CD & Infrastructure Automation:** Established automated Azure DevOps deployment pipelines, Docker containerization, Azure App Services, and Application Insights production telemetry.
- **Database & Enterprise Security:** Optimized SQL Server database performance using EF Core, custom LINQ queries, strategic indexing, and caching; integrated JWT, Single Sign-On (SSO), and granular RBAC.

Aptara — Senior Software Engineer

Oct 2021 – Sep 2022 | Noida, India

Project: PDFeXpress (High-Volume Manuscript Automated Validation Engine)

- **High-Throughput Processing Engine:** Architected an automated PDF validation and conversion engine leveraging VueJS, .NET 5, and Entity Framework Core to validate high-volume academic manuscripts for IEEE's global publishing platform.
- **Bulk Data Execution & Query Optimization:** Refactored complex relational database schemas and ORM query execution plans to seamlessly support concurrent bulk validation operations with zero throughput degradation under heavy load.
- **API Integration & Reliability:** Engineered robust RESTful endpoints with comprehensive error handling, logging middleware, and automated regression testing.

Aptara (via Stratosphere IT) — Senior .NET Developer

Sep 2019 – Oct 2021 | Noida, India

Project: JVATS (Automated Text Parsing & Publishing Platform)

- **Publishing Workflow Automation:** Designed and developed an automated text parsing and content validation platform utilizing AngularJS and scalable RESTful Web APIs for a premier UK educational publisher.
- **Security & Systems Modernization:** Standardized robust OAuth2 and JWT security layers while seamlessly integrating legacy backend infrastructure with modern single-page web applications.

Precision Pyramid — Senior Software Consultant

May 2019 – Jul 2019 | Mumbai, India

Project: Pyrops (Enterprise Warehouse & Logistics Management)

- **Enterprise Logistics Management:** Engineered high-availability warehouse management modules utilizing ASP.NET MVC, Entity Framework, and SQL Server to track and optimize global supply chain and logistics operations.

EBSavvy Infotech — Senior Engineer

Jun 2018 – Apr 2019 | Noida, India

Project: Gallo OCR (Multi-Lingual Archival Digitization Engine)

- **OCR Digitization Engine:** Pioneered a multi-lingual OCR digitizing engine using Angular and Web APIs that transformed high-volume physical historical archives into structured, indexed, and fully searchable digital data repositories.

ALTEN Calsoft Labs | G2C Online | Kairali Ayurvedic | Syncretize

May 2013 – Mar 2018 | Noida / Delhi / Gurugram

Role: Software Engineer / Early Engineering Career — Engineered PLC Automation for Healthcare, Online Hotel Booking Portals, E-Commerce platforms, HRMS, and transactional database solutions using C#, VB.NET, ASP.NET MVC, Entity Framework, LINQ, SQL Server, WCF, and Windows Services across the enterprise Microsoft.NET ecosystem.
